### Israel Support Statement

The Institute for the Voices of Liberty (iVol) unequivocally condemns the cowardly and barbaric attacks by Iran-backed terrorists against the State of Israel and its people.

As Israel's enemies did 50-years ago during Yom Kippur, Hamas and its murderous allies exploited a Jewish holiday to launch its coordinated, stealth attack – one that included launching thousands of rockets, kidnapping civilians and soldiers, and slaying men, women, and children in their villages and homes.

We at iVol support Israel's indisputable right of self-defense and call upon the Biden Administration to give Israel its full backing and support.

Anything less than the Administration's unwavering support gives Israel's enemies reason to believe that the Jewish State will be abandoned by its allies in its time of need. That message will provoke further attacks.

We also call upon world leaders and the media to refrain from drawing any moral equivalence between the atrocities and war crimes committed by Hamas terrorists and the defensive measures taken by the Israel Defense Forces.

We pray for the people of Israel, mourn their horrific losses, and stand with our Israeli brothers and sisters shoulder-to-shoulder now and forever.
